

Vermont Daily Transcript.

ST. ALBANS, VT.
TUESDAY OCTOBER 20, 1868.

Republican Nominations

FOR PRESIDENT,
ULYSSES S. GRANT.FOR VICE PRESIDENT,
SCHUYLER COLFAX.

VERMONT.

For Electors at Large—GEORGE W. GRANTLEY, of Vergennes; H. FAIRBANKS, of St. Johnsbury.

For Elector—Third District—GEORGE WILKINS, of Stowe.

Political.

The Republicans are now charging upon the Democracy at the double-quick all along the line. Their bayonets already prick their breasts, and are about to perforate their bowels. To attempt to change front in such an emergency by the substitution of new candidates, and a revised platform would be merely turning their backs to the foe and fleeing from the field, their assailants pursuing pell mell.

Though it could not be done as gracefully now as previous to the recent defeats, let the Democracy follow the advice we gave them 3 or 4 weeks ago—withdraw Seymour and Blair, and recommend the unanimous choice of Grant. He will be all but unanimously elected anyhow, but the Democracy would gain some credit by making it wholly so, and thus ushering in the counterpart of the happy era of Monroe, when peace, unity, and prosperity reigned in all our borders.

If the Democracy are not prepared to adopt this course, they must fight it out on the present line and make up their minds to fall in November with their backs to the field and their feet to the foe.

They must do something immediately or all is lost, even honor.

There are Democrats about who to-day believe that their party carried Indiana and Pennsylvania on Tuesday. Mistaken souls!

Stock Breeding in Vermont.

Hon. George Wilkins of Stowe, in his address before the Orleans County Agricultural Society, confined himself principally to the discussion of the importance of increased attention in the breeding of domestic animals. He estimated the aggregate value of produce from animals in Vermont for the past year, at \$40,000,000, and remarked that it depends on the mode of feeding the produce whether it results in profit or loss. He further said that there was no occasion for uncertainty in breeding animals: like must produce like—and if you always sell your poorest, your stock must improve. But one quarter of the stock in Vermont yields any profit. Some farmers keep the profitable quarter only and some only the unprofitable three quarters. Many have attempted improvements in stock and failed, but it is simply on account of lack of skill and judgment. If it had not been for an accident, whereby the Morgan breed was obtained, Vermont would be far behind other States in horses. The average price of horses in Vermont is \$110, in New Jersey, \$140. The value of horses in Vermont amounts to about \$4,000,000; and the value of the horses in Orange County, N. Y., is about \$5,000,000. Importation to Orange Co. has made the difference: and if we had as good stock horses as they have, ours would be worth \$40,000,000 instead of \$4,000,000. He asserted that Vermont is running behind in the breeding.

SAVE DEAD LEAVES.—If every horticulturist and farmer would think for a moment on the nature of fallen leaves—which contain not only the vegetable matter, but the earthy salts, lime, potash, etc., needed for the next season's growth and fertility.—and that, too, exactly in the proportion required by the tree or plant from which they fall; nay, more, if they would consider that it is exactly in this way, by the decomposition of these very fallen leaves, that nature enriches the soil, year after year in her great forests, it would hardly be possible for such a reflecting horticulturist or farmer to allow these leaves to be swept away by every wind that blows and finally lost altogether. Nor would he give them away as many now do. He would rather collect, from week to week, the leaves that fall under each tree, and by digging them under the soil about the roots, where they will decay, provide in the cheapest manner the best possible fruit for that tree. If this plan should be tried we should not see old orchards dying out for want of nourishment; but they would, in this simple manner, receive all the enriching they required. Pear trees, and doubtless peach, would be greatly benefited by this procedure. In certain vineyards in France and Italy, the vines are kept in the highest condition by simply burying at their roots every leaf and branch that is pruned off, or falls from the vines at the close of the season. Will not some of our farmers of inquiring minds give this simple process a trial this season? It is a well known fact that no manure is more eagerly sought for by the farmer than leaf manure. It enters largely into the compost prepared for potting. Leaves collected and mixed with barnyard manure, greatly enhance its value. Therefore gather up the leaves that nothing shall be lost.

Potash Lost in Wool-Growing.

The loss of the phosphates which occurs in the production of milk and cheese has long attracted the attention of chemists, and efficient means have been taken for replacing what is thus removed. It now appears that land devoted to wool growing is subjected to a constant and considerable loss of potash, which is removed in the wool. This is particularly the case in regard to those wools which are noted for yield or grease—as the Merino. Such a fleece, weighing 9 lbs., will remove from the soil about 7 ounces of potash, so that in a large flock the aggregate loss will be considerable. It has been proposed that the farmer should take means to save the liquid in which the sheep are washed, and sell it to chemists, who produce potash from it. A better plan would be to return it to the soil.

No chemist could afford to give much for such a diluted solution as will be produced if the sheep are well washed, and the expense of carriage would largely decrease the result to the farmer.

Where large amounts of wool are washed, as in factories, it is found profitable to extract the potash, and in Germany the aggregate amount of potash extracted from waste liquors by companies in Rheims, Elbeuf and Fournies amounts to 200,000 lbs.

The subject is worthy the attention of our farmers. Where special sheep-washing apparatus is used, it would not be difficult to save the liquid, and either apply it as a top-dressing or compost it with swamp-muck. The latter would probably be the best plan.

Grazing Fields.

Of the many faults to which the farmer is addicted, that of feeding down his fields in the fall is one of the most unwise. After continued cropping during the pasturing season the feed gets dry and short, and the short-sighted farmer thinks the best way is to turn the cattle into his fields. It is convenient, and moreover it saves the fall feed. What an erroneous idea! Nature works, as it were, reasonably, and if man attempts to alter and improve her ways, he will most signally fail.

After the hay crop is removed, nature sets to work at once to cover the exposed grass roots by sending forth a new growth of grass, called roven and after-math. The decay of this second crop also enriches the soil, giving a larger yield of grass next year. It is folly for the farmer to feed off this covering of nature. He gets a little present good, at losses in the next crop. Besides, the cattle do much hurt to the grass roots where the grass is wet or moist, by trampling about. Better feed the stock in part from the barn. Feed or cut roven and you get a taste of rain. W. H. L. Raymond, N. H., Sept. 22, 1868.

FASHIONABLE WOMEN.—Dress, dissipation and flirting make up the questionable lines which enclose the life of the fashionable woman, and which enclose nothing useful, nothing good, nothing deep, or true, or holy. Her piety is a pastime; her art the poorest pretence; her pleasure consists only in hurry and excitement, alternating with debasing sloth, in heartless coquetry or in lawless indulgence, as nature made her more vain or more sensual. As a wife, she fulfills no wife's duty in any grand or loving sense, for the most part regarding her husband only as a banker or adjunct, according to the terms of her marriage settlement; as a mother, she is a stranger to her children, to whom nurse and governess supply her place, and give such poor make-shift for maternal love as they are enabled or inclined.

In no domestic relation is she of the smallest value, and of none in any social circumstance beside the mere adorning of a room—if she is pretty—and she helps her to trade through her expenditure. She lives only in the gas-light, and her nature at last becomes as artificial as her habits. As years go on, and she passes from the acknowledged belle to the faded beauty, she goes through a period of frantic endeavor to retain her youth; and even when time has clutched with too firm a hand to be shaken off, and she begins to feel the infirmities which she still puts out all her strength to conceal, even then she grasps at the departing shadow, and fresh daubs the crumbling ruin, in the belief that the world's eyes are dim, and that stucco may pass for marble a year or two more. —London Saturday Review.

WHAT HE THOUGHT.—A few days since, says a Michigan paper, a specimen of humanity, chuck full of fashionable drink, took a seat in the express train at Jackson and quietly awaited the advent of the conductor, who appeared on time and relieved the traveller's hat of his ticket without any remarks. On his return the traveller buttoned him and inquired:

"Conductor, how far is't to Poleton?"

"Twenty miles."

"That's wot I tho't."

At the next station, the traveller stopped him and again inquired—

"Conductor, how far to Manchester?"

"Twenty miles."

"That's wot I tho't."

At Manchester the traveller stopped him the third time and said—

"Conductor, how far to Tecumseh?"

"Twenty miles."

"That's wot I tho't."

As the train left Tecumseh, the traveller exhausted the patience of the conductor, and the following dialogue explains the result:

"Conductor, how far to Adria'n?"

The conductor threw himself upon his dignity, and remarked—

"See here, my friend, do you take me for a fool?"

An old lady on a steamboat observed two men pumping water to wash the deck, and the captain being near, she accosted him as follows:

"Well, captain, got a well aboard, eh?"

"Yes, ma'am, always carry one," said the polite captain.

"Well, that's clever. I always disliked this nasty river water, especially in dog days."

Pennsylvania Election.

PHILADELPHIA, Oct. 17.

Returns from 49 counties (official) and the balance of reported majorities foot up 10,083 Republican majority.

PITTSBURG, Oct. 17.

The official vote of Allegheny Co., gives Harrauff (Republican) 8,957 majority.

"My dear sir," said a candidate, accosting a sturdy wag on the day of election, "I'm very glad to see you."

"You needn't—I've voted," replied the wag.

The Republicans of San Francisco received the Ohio, Pennsylvania, and Indiana election news by telegraph at midnight, and paraded the streets with music, and the wildest enthusiasm prevailed.

News and Miscellaneous Items.

Williams college has a class of 40 students learning the art of boxing.

Dr. Schaff has accepted the professorship of ecclesiastical history at Yale.

The brother of the King of Sweden has translated "The Cid" in Swedish very creditably.

James McCarroll, of Buffalo, has made a novel out of the Fenian invasion of Canada, and called it Ridge-way.

Addison Gage, the well-known Boston ice merchant, died at his residence, at Arlington, Mass., on Tuesday night.

Captains of vessels report that the storm on Lake Huron on Friday night, October 16, was the severest and most destructive felt for many years. Several collisions occurred. Three or four barges had broken loose from Tur Point. Two men, a woman and two children were drowned.

Mr. Carlyle once actually wrote a piece for an annual album, called the Keepsake, and it was about the Italian opera.

A Fenian prisoner in a jail at Ottawa, Ontario, made a desperate but unsuccessful attempt to escape on Tuesday night.

A large telescope is being built at Cambridge, Mass., for the Westeyan University of Middletown, Ct.

Mrs. Stowe has raised a 35 pound watermelon. Strange to say, she has neglected to bestow it upon Gov. Seymour.

A portrait of Dr. Guillotin, after whom the guillotine was named, is announced for sale in Paris. It was painted by Canot, a pupil of David.

While in the midst of life we are in death was recently fearfully verified in a small town of Belgium. A young girl, while dancing a galop, died in the arms of her partner.

The aggregate amount of exports, exclusive of specie, from the port of New York, to foreign ports, for the week ending Oct. 13 was \$2,753,889.

The number of emigrants that arrived at New York up to the 14th Oct. was 179,165, against 200,300 to same date last year.

Special Notices.

Twenty-five Years Practice

In the Treatment of Diseases incident to Females, has placed Dr. Dow at the head of all the physicians making such practice a specialty, and enables him to guarantee a speedy and permanent cure in the worst cases of *Suppression* and all other *Menstrual Derangements*, from whatever cause. All letters for advice must contain \$1. Office, No. 9 Endicott Street, Boston.

J. B. Board furnished to those desiring to remain in the city.

Boston, July, 1868. 226 (v)rdw

Errors of Youth. A gentleman who suffered for years from nervous debility, and premature decay, and all the effects of youthful indiscretion, will, for the sake of suffering humanity, send free to all who need it, the receipt and directions for making the simple remedy by which he was cured.

Sufferers wishing to profit by the advertiser's experience, can do so by addressing, in perfect confidence,

JOHN R. GRIFFIN, 42 Cedar Street, New York.

The American Cooking Stove.

ANOTHER PATENT SUIT.—We understand Messrs. Shear, Packard & Co. have been compelled to commence a suit against Hunt & Miller, of Hudson, for infringing the Patent on the Ash Sifter in the American Cooking Stove. This is the fifth suit they have been compelled to bring against different parties on this Stove.

The four previous suits have resulted favorably for S. P. & Co., and they are determined to follow up all cases of infringement until their cease from appropriating their improvements. —Albany Evening Journal, July 29th, 1868.

All persons are cautioned against selling or using Stoves with a Shaking Ash Sifter in the hearth, or under the grate, as this improvement is fully secured to us by five different Patents, and all persons selling or using Stoves with this improvement, will be liable to prosecution for infringement, as we have granted no licenses to other parties to make or sell this improvement and all infringements will be promptly prosecuted.

HEAR, PACKARD & CO., Albany, N. Y.

For Sale by D. M. WALKER, ST. ALBANS, VT.

234w3m

SCROFULA—CONSUMPTION.

Dr. LUGOL, of Paris, one of the most eminent Chemists of Europe, said:

"The most astounding results may be anticipated when Iodine can be dissolved in pure water."

Dr. H. ANDERS, after fifteen years of scientific research and experiment, has succeeded in dissolving one and one quarter grains of Iodine in each fluid ounce of water, and the most astonishing results have followed its use, particularly in Scrofula and kindred diseases. Circulars free.

Dr. H. Anders' Iodine Water is for sale by J. P. DINSMORE, 36 Day Street, New York, and all Druggists.

4w-237

THE GREAT NEW ENGLAND REMEDY FOR ALL AFFECTIONS OF THE THROAT, LUNGS, BRONCHITIS, SPITTING OF BLOOD, AND PULMONARY AFFECTIONS generally. It is a remarkable remedy for Kidney Complaints, Diabetes, Difficulty of Voiding Urine, Bleeding from the Kidneys and Bladder, Gravel and other Complaints.

Boston, Jan. 29, 1868.

POLAND'S WHITE PINE COMPOUND.—After having given it a thorough trial we can confidently recommend Poland's White Pine Compound as a very valuable article for the cure of colds, coughs, and pulmonary complaints generally. In several cases we have known it to give prompt relief when all other remedies have failed. It is an article which in a climate so propitious of sudden and severe colds as that of New England, ought to be in every family; and we are sure that those who once obtain it and give it a fair trial, will not thereafter be willing to be without it.

A VALUABLE MEDICINE.—Dr. Poland's White Pine Compound, advertised in our columns, is a successful attempt to combine and apply the medicinal virtues of the White Pine Bark. It has been thoroughly tested by people in this city and vicinity, and the proprietor has testimonials to its value from persons well known to our citizens. We recommend its trial in all those cases of disease to which it is adapted. It is for sale by all our Druggists. —[N. Y. Ind.] The White Pine Compound is now sold in every part of the United States and British Provinces, by the New England Botanic Depot, Boston, Mass. 296-47

MOOTH PATCHES, FRECKLES AND TAN. THE ONLY RELIABLE REMEDY For those brown discolored spots on the face is "Perry's Mooth and Freckle Lotion." Prepared only by Dr. B. C. Perry, 49 Bond St., New York. Sold everywhere. 29-210-6m

DYSPEPSIA.

There is no disease which experience has so amply proved to be remediable by the

PERUVIAN SYRUP.

(a protected solution of the Protoxide of Iron.) as Dyspepsia. The most inveterate form of this disease have been completely cured by this medicine, as ample testimony of some of our first citizens proves.

FROM THE VENERABLE ARCHDEACON SCOTT, D.D.

DUNHAM, Canada East.

"I am an inveterate Dyspeptic of more than 25 years standing."

"I have been so wonderfully benefited in the three short weeks during which I have used the Peruvian Syrup, that I can scarcely believe myself of the reality. People who are known to me as sound and robust, and as being widely known, and can but recommend to others that which has done so much for me."

ANOTHER CLERGYMAN WRITES AS FOLLOWS:

"My voyage to Europe is indefinitely postponed. I have discovered the 'Fountain of Health' on this side of the Atlantic. Three bottles of Peruvian Syrup have rescued me from the fangs of the fiend Dyspepsia."

A pamphlet of 32 pages, containing a history of this remarkable remedy, with a treatise on "Iron as a medicine," will be sent free to any address.

The genuine has "PERUVIAN SYRUP" blown in the glass. J. P. DINSMORE, Proprietor, 36 Day Street, New York.

Sold by all Druggists. 4w-237

TO FEMALES.

DR. FREDK MORRILL, Physician and Surgeon, gives exclusive attention to Diseases of women. He has made diseases of woman his study for the past twenty years. His practice has been very extensive both in Hospital and in private practice. His reputation has vouches in all the city papers, his patients, and the medical profession, both here and abroad, as being the most skillful specialist here, and a thorough master of all sexual diseases.

Dr. Morrill is admitted by the best medical talent of the country to have no equal in the treatment of female complaints, and it is no unusual occurrence for physicians in regular practice to recommend patients to him for treatment when afflicted with diseases in his specialty.

Ladies will receive the most scientific attention, both medically and surgically, with private apartments during sickness, and with old and experienced nurses, if they wish.

The poor advised free of charge. Physicians or patients wishing his opinion or advice, by letter, and enclosing the usual fee, will be answered by return mail.

Medicine sent to all parts of the country. Office, No. 48 HOWARD STREET, Boston, Mass. 214-ly

Buy Tracy's Vegetable Healing Balm:

For it is a Magic Ointment, and will destroy and cure Erysipelas, Eczema, Erysipelas, and Scrofula Sores, Ives Poison, Rheumatism, Croup, Diphtheria, Cuts, Burns, Bruises, &c. And is also good for pains in the Back, Side and Chest, and is a specific for Man or Beast.

S. R. DAY, Agent, St. Albans. 183-ly

A LECTURE TO YOUNG MEN,

Just Published in a Seal'd envelope. Price 6cts.

A LECTURE on the Nature, Treatment and Prevention of Syphilis, Gonorrhea, and all the Venereal Diseases, including the most recent and successful mode of curing them, by ROBERT J. CULVERWELL, M.D., Author of the "Green Book," &c.

The world-renowned author, in this admirable Lecture, clearly proves from his own experience that the awful consequences of Self-Abuse may be effectually removed without medicine, and without dangerous surgical operations, bougies, or caustics, rings, or conchoids, pointing out a mode of cure at once certain and effectual, to which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically. This Lecture will prove a boon to thousands and thousands.

Sent under seal, to any address, in a plain, sealed envelope on the receipt of six cents, or two postage stamps. Also, Dr. Culverwell's "Marriage Guide," price 25c. Address the Publishers.

CHAS. J. C. KLINE & CO., 127 Bowery, New York, Post Office Box 4,386.

"It Work's Like a Charm."

Renne's Pain-Killing Magic Oil cures Head-ache.

Renne's Pain-Killing Magic Oil cures Tooth-ache.

Renne's Pain-Killing Magic Oil cures Neuralgia.

Renne's Pain-Killing Magic Oil cures Cholera Morbus.

Renne's Pain-Killing Magic Oil cures Rheumatism.

Renne's Pain-Killing Magic Oil cures Lame-ness.

Renne's Pain-Killing Magic Oil cures Skin Diseases.

Some folks seem to be proud of telling how "lame their shoulders are"—of my creak in the back—or, "I have not the strength to do a thing in bragging that "nothing can cure me"—but when we get such "awful folk" to use Renne's Pain-Killing Magic Oil, faithfully, we not only cure their lameness and charm away their pains, but we actually take all that kind of "brag out of them," and they frankly own up and say, "It work's like a charm!"

Sold by all Druggists, Merchants and Grocers. WM. RENNE, Sole proprietor and manufacturer, Pittsfield, Mass. [182-cow-ly]

P. O. Try a box of Prand's Plantain Oil. Prand's Plantain Oil is the best in the World. Take no other, but insist on having this. For sale by all Druggists and Country Dealers. D. J. W. POLAND, Manufacturer.

CANCER, SCROFULA, DYSENTERIA, LIVER COMPLAINT, Rheumatism, Numbness, &c. A book of 100 pages, sent free to invalids. Address R. GREENE, M.D., 10 Temple Place, Boston, Mass.

WOMAN.

FEMALES, OWING TO THE PECULIAR and important relations which they sustain, their peculiar organization, and the offices they perform, are subject to many sufferings. Freedom from these contribute in no small degree to their happiness and well-being, and to the happiness of the whole. Not only so, but none of these various female complaints can long be suffered to run on without involving the general health of the individual, and ere long producing permanent sickness and premature decline. Nor is it pleasant to consult a physician for the relief of these various delicate affections, and only upon the most urgent necessity will a true woman so far sacrifice her greatest charm as to be found in the arms of a physician.

The sex will then thank us for placing in their hands a simple species which will be found efficacious in relieving and curing almost every one of those troublesome complaints peculiar to the sex.

HELMHOLD'S EXTRACT OF BECCARIA, Hundreds suffer in silence, and hundreds of others apply vainly to druggists and doctors, who either merely tantalize them with the hope of a cure or apply remedies which make them worse. I would not wish to assert anything that would do justice to the afflicted, but I am obliged to say that although it may be produced from excessive indulgence in the use of tea and coffee, and frequent childbearing, it is far oftener caused by diet irregularity, applied to the mucous membrane of the vagina.

When reviewing the causes of these distressing complaints, it is most painful to contemplate the attendant evils consequent upon them. It is but simple justice to the subject to compare a few of the many additional causes which so largely affect the life, health, and happiness of woman in all classes of society, and which, consequently, affect more or less directly, the welfare of the entire human family. The manner that exists for premarital education and marriage, causes the years that nature designed for corporeal development to be wasted and perverted in the restraints of dress, the early confinement of school, and especially in the unhealthy excitement of the ball-room. Thus, with the body half-clothed, and the mind excited by pleasure, perverting in midnight revels the hours designed by nature for sleep and rest, the work of destruction is half accomplished.

In consequence of this early strain upon her system, much necessary effort is required by the delicate votary to retain her situation in school at a later day, thus aggravating the evil. When one excitement is over, another in prospective keeps the mind morbidly sensitive to impression, which renders necessary the constant use of stimulants, absolutely forbidding the exercise necessary to the attainment and retention of organic health and strength; the exposure to night air; the sudden change of temperature; the complete prostration produced by excessive dancing, and the use of stimulants, produce a cumulative effect. At last, an early marriage capes the climax of misery, and the unfortunate one, hitherto so utterly regardless of the pain declares and remonstrances of her delicate nature, becomes an unwilling subject of medical treatment. This is but a truthful picture of the experience of thousands of our young women.

Long before the ability to exercise the functions of the generative organs, they require an education of their peculiar nervous system, composed of what is called the "female system," in common with the male breast and tips, evidently under the control of mental emotions and associations at an early period of life; and, as we shall subsequently see, these emotions, when excessive, lead, long before puberty, to habits which sap the very life of the future creature, and have self-completed their development.

For Female Weakness and Debility, Whites or Leucorrhoea, Too Profuse Menstruation, Exhaustion, Too Long Continued Periods, for Propagation and Bearing Down, and Prolonged Uterine, we offer the most perfect specific known: HELMOLD'S COMPOUND EXTRACT OF BECCARIA.

Females in every period of life, from infancy to extreme old age, will find it a remedy to suit nature in the discharge of her functions. Strength is the glory of mankind and womanhood. HELMOLD'S EXTRACT BECCARIA is more strengthening than any of the preparations of Bark or Iron, infinitely safer, and more pleasant. HELMOLD'S EXTRACT BECCARIA is more pleasant, HELMOLD'S EXTRACT BECCARIA is more pleasant, HELMOLD'S EXTRACT BECCARIA is more pleasant.

Depression, Indolence, Determination of Blood to the Head, Confused Ideas, Hysteria, General Irritability, Restlessness and Sleeplessness at Night, Absence of Muscular Efficiency, Loss of Appetite, Dyspepsia, Emaciation, Low Spirits, Disorganization or Paralysis of the Organs of Generation, Palpitation of the Heart, and in fact, all the concomitants of a Nervous and Debilitated state of the system. To insure the genuine, cut this out. Ask for HELMOLD'S. Take no other. Sold by Druggists and Dealers everywhere. Price \$1.25 per bottle, or six bottles for \$6.50. Delivered to any address. Describe symptoms in all communications. Address H. T. HELMOLD, Drug and Chemical Warehouse, 534 Broadway, N.Y.

None are genuine unless done up in steel engraved wrapper, with facsimile of my Chemical Warehouse, and signed

H. T. HELMOLD.
